Brendan Eggers

Forward Deployed and Senior Software Engineer

Connecticut (NYC metro) • brendan@eggers.dev • eggers.dev • github.com/eggdev • linkedin.com/in/brendaneggers

Forward Deployed and Senior Software Engineer who takes ambiguous products and requirements and finds the answers and valuable path forward. Nine years of full-stack product work, from NBA.com to solo ventures. I thrive in opportunities that require meshing together domain knowledge across the organization.

EXPERIENCE

Director, Software Engineering • LV Collective — Oct 2024 – Present

Forward deployed engineer guiding the organization to the AI-Native frontier

- Administered Claude Teams subscription for 50+ users, establishing robust access policies and usage guardrails to ensure secure AI adoption.
- Established and led the AI Builders Committee, training 20+ non-technical staff in prompt engineering, context-window management, and agent-building workflows.
- Partnered with 3 Asset Management leaders to build an MCP server, reducing property lookup time from hours to a single agent question.
- Shipped Upcredit, a rent-reporting credit product now live across the company's student-housing portfolio and built to run with almost no upkeep, generating pure profit each month.
- Developed a vertically integrated student housing rental tool that tracks 3,000 assets across 300 markets, improving data accessibility.

Technical Co-Founder & CTO • Bar Savvy — May 2023 – Present

Independent venture founded in 2023 and incubated at LV Collective since October 2024.

- Spearheaded the end-to-end development of a SaaS product, including ETL, React frontend, and React Native mobile app, processing 3M+ receipt rows.
- Architected the full stack from authentication and security to subscription checkout and code quality as the solo engineer, later coordinating 3 contractors through project delivery.
- Ran LLM modules in production for classification and fuzzy address matching, gating each with deterministic checks and adding a second-pass reviewer that flagged disagreements for human review.
- Drove product improvements through direct customer conversations; grew to over 500 users.
- Designed an agent harness with custom lint rules and immutable PreToolUse guardrail hooks to enforce code standards across generated code.

Senior Software Engineer • NBA, Direct-to-Consumer — Mar 2022 – Oct 2024

Served as lead engineer for client-side authentication, subscription checkout, and third-party account linking across NBA digital properties.

- Operated NBA.com's score strip, serving 1+ million users daily during peak game traffic.
- Tech-led the League Pass purchase page and block-rendering system, making architecture and delivery decisions across 5 engineers on different teams; front door to 100K+ annual subscriptions.
- Built the subscription offering and entitlements association for Local Access in-market streaming across NBA and WNBA team markets, ensuring tens of thousands of new subscribers could watch content through the app's streaming platform.
- Led the Authentication and Account Linking flows connecting thousands of users with Nike, YouTube, FanDuel, and other distribution partners.
- Rotated to the DevOps team and created an internal self-service repository-generation tool used by 5+ DTC teams while running Kubernetes at scale.

Senior Frontend Engineer • Orange Comet (contract, then full-time) — Sep 2021 – May 2022

Frontend Engineer • OpenSlate; acquired by DoubleVerify — Mar 2021 – Jan 2022

Software Engineer • MakeSpace — Aug 2020 – Mar 2021

Frontend Engineer • OpenSlate — Dec 2019 – Jun 2020

Frontend Web Developer • Meredith Corporation (Synapse Group) — Apr 2017 – Dec 2019

SKILLS

Languages	TypeScript, JavaScript, Python, SQL, English
Frameworks & Runtimes	React, Next.js, Vite, React Native (Expo), Node, Bun, Effect, REST APIs, Hono, FastAPI, Zustand, Redux, Mobx, GraphQL
Data & Infrastructure	Postgres, Supabase, PostgreSQL, PostGIS, Materialized Views, Table Partitioning, ETL Pipelines, Full-Text Search, Vector Tile Search, Geospatial Querying, Apache Airflow, Kubernetes, Docker, CI/CD, AWS, Azure, Github Actions
AI & LLM Tooling	Claude, Codex, MCP, Prompt Engineering, Loop Engineering, Hermes, OpenClaw, LLM Integration, Agent Guardrails
Practices	Local-First Architecture, Test-Driven Development, Domain-Driven Design, Design Systems, Monorepos, Authentication & Security

EDUCATION

Boot Camp	General Assembly, Web Development Immersive	2016
B.A.	Wittenberg University	2014
